Studying at Radboud University

Quality, connection and personal contact are central to our educational vision. This has a positive impact on development opportunities for our students and on their well-being. 'The right student in the right place' is our guiding principle.

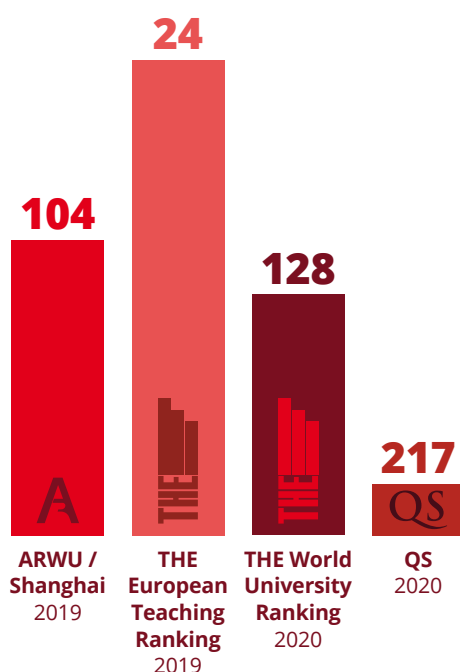

We want every student on campus to develop holistically. Contact between lecturer and student, and among students themselves is an essential part of their studies. All students receive philosophical training and come into contact with sustainability issues within their own discipline. Our students are trained in strong communication skills in preparation for the job market.

“Our students develop critical thinking skills in preparation for responsible positions in society.”

A large number of students, numerous events and festivals, unique hot spots and cosy restaurants all add up to an unprecedented liveliness in our city. Just put your feet in the sand at our city beach next to the river Waal, or relax at one of the numerous sidewalk cafes. A large array of both chain stores and small and unique specialty stores will complete your Nijmegen experience.
